

Workday Health Check & Optimization

Elevate efficiency, productivity, and Workday ROI

Are you getting the most out of your Workday investment? Have Workday updates left you behind? Are complex business processes causing inefficiencies?

Impact Advisors' Workday Health Check & Optimization service, delivered by our seasoned experts, empowers you to:

- Understand your Workday tenant's potential within the current configuration.
- Assess and overcome adoption challenges.
- Align your setup with Workday best practices for optimal system efficiency.
- Address pain points and streamline processes to meet business needs.
- Craft a plan for continuous improvement and catch up on missed Workday updates for the latest system capabilities.

Our Approach to Workday Optimization

Impact Advisors' approach encompasses four steps, tailored to deliver actionable insights:

Key indicators of optimization opportunity

If any of these signs resonate, our service is designed for you:

- ▶ Reporting is a mystery. Users are unable to get to the data they need.
- ▶ Data security concerns persist beyond go-live.
- ▶ Configuration or process challenges are on the rise, and your backlog is growing.
- ▶ Downstream impacts to configuration changes raise stability concerns and have resulted in no or few updates to meet business requirements and changes.
- ▶ Team understanding of the current configuration is limited and/or key configuration knowledge is concentrated among a few team members.
- ▶ Recent Workday updates have been overlooked.

Experience the transformative power of Impact Advisors' Workday Health Check and Optimization Service.
